Snow Day Radar™

How to read the odds

Snow Day Radar gives your district its chance of no in-person school for the next school day.

80%	*Strong chance*
70%	*Good chance*
60%	*Better than even*
50%	*Coin flip*
40%	*Real chance*
30%	*Small chance*
20%	*Long shot*
Under 20%	*School's likely on*

Never 100%. Weather can surprise anyone, so a good forecast never says it's certain.

Look for the Why. Every number comes with its reason: snow by 7 AM, ice, wind chill at bus time.

Further out, bigger steps. Two days out: 20, 40 or 60%. Three days out: 10, 30 or 50%, or under 5%.

Odds, not announcements. Your district makes the call.
